The National Assessment of Educational Progress (NAEP) assesses mathematics in five content areas: number properties and operations; measurement; geometry; data analysis and probability; and algebra. The NAEP mathematics scale ranges from 0 to 500.

Overall Mathematics Results for South Dakota

- In 2007, the average scale score for fourth-grade students in South Dakota was 241. This was not significantly different from their average score in 2005 (242) and was higher than their average score in 2003 (237).¹
- South Dakota's average score (241) in 2007 was higher than that of the nation's public schools (239).
- Of the 52 states and other jurisdictions that participated in the 2007 fourth-grade assessment, students' average scale score in South Dakota was higher than those in 22 jurisdictions, not significantly different from those in 16 jurisdictions, and lower than those in 13 jurisdictions.²
- The percentage of students in South Dakota who performed at or above the NAEP *Proficient* level was 41 percent in 2007. This percentage was not significantly different from that in 2005 (41 percent) and was greater than that in 2003 (34 percent).
- The percentage of students in South Dakota who performed at or above the NAEP *Basic* level was 86 percent in 2007. This percentage was not significantly different from that in 2005 (86 percent) and was greater than that in 2003 (82 percent).

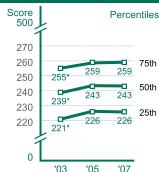

NOTE: The NAEP grade 4 mathematics achievement levels correspond to the following scale points: Below *Basic*, 213 or lower; *Basic*, 214–248; *Proficient*, 249–281; *Advanced*, 282 or above.

Performance of NAEP Reporting Groups in South Dakota: 2007						
	Percent	Average	Percent	Percent of students at or above		Percent
Reporting groups	of students	score	below Basic	Basic	Proficient	Advanced
Male	51	242	14	86	43	4
Female	49	240	14	86	38	3
White	83	245	9	91	46	4
Black	2	221	37	63	15	2
Hispanic	2	228	31	69	21	2
Asian/Pacific Islander	1	‡	‡	‡	‡	‡
American Indian/Alaska Native	12	218	40	60	13	#
Eligible for National School Lunch Program	36 ↓	230	25	75	25	1
Not eligible for National School Lunch Program	64 ↑	247	8	92	49	5

Average Score Gaps Between Selected Groups

- In 2007, male students in South Dakota had an average score that was not significantly different from that of female students. In 2003, the average score for male students was higher than that of female students by 4 points.
- In 2007, Black students had an average score that was lower than that of White students by 24 points. Data are not reported for Black students in 2003, because reporting standards were not met.
- In 2007, Hispanic students had an average score that was lower than that
 of White students by 18 points. In 2003, the average score for Hispanic
 students was lower than that of White students by 18 points.
- In 2007, students who were eligible for free/reduced-price school lunch, a
 proxy for poverty, had an average score that was lower than that of
 students who were not eligible for free/reduced-price school lunch by 17
 points. In 2003, the average score for students who were eligible for
 free/reduced-price school lunch was lower than the score of those not
 eligible by 16 points.
- In 2007, the score gap between students at the 75th percentile and students at the 25th percentile was 33 points. In 2003, the score gap between students at the 75th percentile and students at the 25th percentile was 34 points.

NOTE: Scores at selected percentiles on the NAEP mathematics scale indicate how well students at lower, middle, and higher levels performed.

Rounds to zero.

- ‡ Reporting standards not met.
- * Significantly different from 2007.
- † Significantly higher than 2005. | Significantly lower than 2005.

¹ Comparisons (higher/lower/narrower/wider/not different) are based on statistical tests. The .05 level was used for testing statistical significance. Statistical comparisons are calculated on the basis of unrounded scale scores or percentages. Comparisons across jurisdictions and comparisons with the nation or within a jurisdiction across years may be affected by differences in exclusion rates for students with disabilities (SD) and English language learners (ELL). The exclusion rates for SD and ELL in South Dakota were 1 percent and "percentage rounds to zero" in 2007, respectively.For more intormation on NAEP significance testing see http://nces.ed.gov/nationsreportcard/mathematics/interpret-results.asp#statistical.

² "Jurisdictions" refers to states and the District of Columbia and the Department of Defense Education Activity schools.

NOTE: Detail may not sum to totals because of rounding and because the "Information not available" category for the National School Lunch Program, which provides free and reduced-price lunches, and the "Unclassified" category for race/ethnicity are not displayed. Visit http://nces.ed.gov/nationsreportcard/states/ for additional results and detailed information.
